## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a portable hemming apparatus having a mounted drive.

Group II, claim(s) 9-13, drawn to a portable hemming device having a roller plate.

Group III, claim(s) 14, drawn to a method of edge hemming using a robot arm.

Group IV, claim(s) 15, drawn to a method of edge hemming using a pedestal stand.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

3. Between Groups I and II, Group I does not require the roller plate structure as required by Group II, while Group II does not require the specific drive structure as required by Group I.

4. Between Groups I and III, Group I does not require the specific steps of Group III, including mounting the hemming apparatus to the end of the robot arm, while Group III does not require the specific structure of Group I, including the specific drive structure claimed.

5. Between Groups I and IV, Group I does not require the specific steps of Group IV, including mounting the hemming apparatus to a pedestal stand, while Group IV does not require the specific structure of Group I, including the specific drive structure claimed.

6. Between Groups II and III, Group II does not require the specific steps of Group III, including mounting the hemming apparatus to the end of the robot arm, while Group III does not require the specific structure of Group II, including the roller plate assembly claimed.

7. Between Groups II and IV, Group II does not require the specific steps of Group IV, including mounting the hemming apparatus to a pedestal stand, while Group IV does not require the specific structure of Group II, including the roller plate assembly claimed.

Art Unit: 3726

8. Between Groups III and IV, Group III does not require the specific steps of Group IV, including mounting the hemming apparatus to a pedestal stand, while Group IV does not require the specific steps of Group III, including rotating the hemming apparatus so that the final hem die set is oriented towards the portion of the metal panel to be hemmed.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 3726

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
